

Back story: When we first moved in (1997), we had the local nursery install (55) Leland trees. The nursery spaced them 3' on center. These trees mature at 10' Wide x 35' High. Over the years, the lower branches have been stifled and are deteriorating. We know better now and have shared this misfortune with neighbors who (in turn) have spaced their Leland's accordingly. We welcome any comments and concerns if you are thinking of planting this type of tree on your property.

In November 2019, to combat this shortcoming, 'we' physically planted 30 Thuja **Green Giants** 5' on center and plan to trim them at 8' in height. This will take many more years to happen. You can elect to sponsor one of the remaining **TGG's**. Don't worry, no funds are needed but a crafty cool looking "This Thuja (#) is sponsored by your name, city, state" sign created by you and sent to us, will be positioned next to your selected tree. Let us know which of the remaining trees (17, 18 and 19) you would like to sponsor.

November 11, 2023 Update: 23 signs received to date, 4 pending completion (1, 2, 9, 29), 3 remain available.

We have received notice that signs 1 and 2 have had production issues and are delayed. Thuja sponsors for 9 (from DE) and 29 (from Sweden), please send your production status.
